

Frequently Asked Questions

SHIZUOKA BANK

Below are FAQs in and after the financial results briefing on February 3rd, 2017.

Q1	<p>Why was bond-related income such as JGBs negative, and what is the Bank's securities management policy going forward?</p> <ul style="list-style-type: none"> Valuation losses on foreign bonds, mainly U.S. treasuries, arose due to U.S. interest rates rising higher than anticipated. The Bank quickly cut its losses via write off from the perspective of ensuring a degree of freedom and maneuverability in its management of securities going forward. Although it was possible to secure interest income by retaining ownership of foreign bonds, priority was given to maintaining the soundness of the securities portfolio. In terms of the basis for this management decision, with regard to shareholdings, as the number of shares available for sale increased due to cross-share cancellation requests from large-lot financial institution shareholders, this timing also enabled us to seize the opportunity to realize unrealized gains by selling when share prices were high. “Others (foreign bonds/investment trusts)” within valuation gains and losses from the revaluation of securities amounted to JPY -17bn as of December 31, 2016, which was reduced to JPY -1.1bn as of January 31, 2017. The valuation loss nearly cancelled due to market disruption. Also, as of January 31, 2017, the level of valuation gains and losses from the revaluation of securities increased from December 31, 2016. We believe this disposal enabled the Bank to achieve the early removal of future risk factors. Going forward, our policy will be to rebuild our securities portfolio while paying attention to market trends.
